WITHIN FOURTEEN DAYS OF THE FIRST DATE OF THIS NOTICE.

Solar Energy Direct Uses

Interested in Going Solar? Planning on building a new home? What is the path to energy independence for the Alberta homeowner? Interested in greening your job? Solar technologies are rapidly being adopted all over the world and most of them work very well in Alberta. Find out about the latest opportunities in the world of solar energy at an Alberta-specific solar energy technology workshop.

In this class you will learn:

- How to plan a solar electric system for your home or business including the basic components, costs and benefits, sources of equipment and installers.
- The design principles and working parts of an Alberta off-grid cabin solar electric system.
- The options and components of a solar hot water system for your home.
- The elements of cold-climate solar home design from an energy efficient house on up to a full net zero energy building.
- A solar greenhouse plan capable of growing fresh produce year round in Alberta.

This is not a hands-on installation course; however, a number of other additional solar applications will be explained including solar water pumping, solar crop drying, solar ovens, solar cars, etc. Equipment will also be demonstrated in class. Students will receive a Solar Energy Society of Alberta certificate of completion.

WHERE: Leduc County Agricultural Services Building
1101 – 5 Street, Nisku

WHEN: Tuesday evenings, Mar. 3, 10, 17 & 31, Apr. 7 & 14
This class includes a tour on Sat., Apr. 11 (10 a.m. to 2 p.m.)

TIME: 6:30 to 9:30 p.m.

COST: \$250

WORKING WELL

Clean water. Well protected.

And
County of Wetaskiwin
Presents

Working Well Workshop

Wednesday February 25, 2015 6:00 pm
Millet Agriplex Hugo Witt Room 5290 – 45 Ave. Millet, AB
Consider how your life would change if you lost your water supply!

Did you know that a poorly maintained water well can put your water supply at risk of contamination and reduce your well yield?

If you are one of 450,000 Albertans who use their water well for household purposes, the key to ensuring your water supply is safe and secure is knowing how groundwater works, learning about your well and understanding how to properly maintain it.

Proper water well siting, construction, maintenance and plugging will help protect your well from biofouling and contamination, save you costly repairs, and ensure your well water yields are sustained over many years.

Find out what you can do to protect your well. Attend the FREE water well management workshop being hosted by County of Wetaskiwin and presented by the Working Well Program, with technical expertise provided by Alberta Agriculture and Rural Development and Alberta Environment and Sustainable Resource Development.

During the workshop we will cover:

- Groundwater – how it works
- Water quality and quantity testing
- Well protection – protecting your well from contamination
- Basic well maintenance
- Water sampling – how to do it

To attend the workshop, please pre-register by calling Heather at the County of Wetaskiwin Office. We will require your legal land description in order to retrieve your water well report from the Alberta Water Wells Groundwater information site.
