## STRYCHNINE SALES

Health Canada is cancelling the registration of all Strychnine products used to control Richardson ground squirrels. The last day producers will be able to purchase Strychnine from the County will be March 4, 2022 and will have until March 4, 2023 to use the purchased product. Continued possession and/or use of the product after this date is a violation of the Pest Control Products Act. For additional information please visit the County of Wetaskiwin website.

## Working Well Workshop

March 18, 2021 • 6:30 pm

### *Consider how your life would change if you lost your water supply!*

Did you know that a poorly maintained water well can put your water supply at risk of contamination and reduce your well yield?

If you are one of 450,000 Albertans who use their water well for household purposes, the key to ensuring your water supply is safe and secure is knowing how groundwater works, learning about your well and understanding how to properly maintain it.

Proper water well siting, construction, maintenance and plugging will help protect your well from biofouling and contamination, save you costly repairs, and ensure your well water yields are sustained over many years.

Find out what you can do to protect your well. Attend the **FREE, live, online** (via Zoom) **water well management workshop** being hosted by **County of Wetaskiwin and Leduc County**, and presented by the Working Well Program, with technical expertise provided by Alberta Agriculture and Forestry, Alberta Environment and Parks, Alberta Health Services and licensed water well drillers.

During the workshop we will cover:

- Groundwater – how it works
- Water quality and quantity testing
- Well protection – protecting your well from contamination
- Basic well maintenance
- Water sampling – how to do it

To participate in this virtual workshop, please pre-register here: <https://bit.ly/39chCCt>
